Career Objective:

Want to enter in software testing industry and want to know more about software products, dig it to test it and want to be a complete QA in future with my Manual and Automation skills.

Skills:

Tools and Technologies: Selenium IDE, Selenium WebDriver, Postman, JMeter, Jira, Maven, TestNG, C Programming, PHP, JAVA, DBMS, HTML, CSS, Javascript, Ajax, MySQL.

Industry Knowledge:

Quality Assurance: Have good knowledge of **Manual Testing** and **Automation Testing**. Have experience to write **Test Case** and have knowledge about **Test Planning**. Also have the knowledge of **Agile Methodology** and **Scrum**. Experience to work with **Selenium IDE**, **Selenium WebDriver** for automation testing and **Postman** for API Testing and also **JMeter** for Performance Testing. Also have knowledge about **Jira** Software.

Experiences:

- **Professional Experiences:**

Mozilla QA: I am working here as a contributor from 2015 to present. I do many software and feature testing of Mozilla like, Firefox, TestPilot (<https://almastushar.wordpress.com/>), Firefox Preview (Android App), Firefox Add-ons etc. I also do Bug verification, Bug Triage. In Bangladesh Mozilla

QA Community, I also work as a mentor and did many events in many universities.

Mozillian Profile: <https://mozillians.org/en-US/u/almastushar/>

Bugzilla Profile: https://bugzilla.mozilla.org/user_profile?user_id=559179

GitHub Profile: <http://github.com/almastushar>

- **Academic Experiences:**

Software Testing & Quality Assurance (BITM): Learned both manual and automation testing and QA under BITM certification course.

Android App Development: Did 3 months long course on Android App Development which is organized by GDG & DIU.

App: <https://tinyurl.com/y5c8r7hp>

Web Development & Design: Did 3 months long course on Web Development & Design course which is organized by DIU.

National Hackathon 2016, ICT Division (Participant)

Automation Project:

Did Automation Testing on demo.opencart.com using Page Factory in Maven Project. Automated top features of this site.

Project Link: https://github.com/almastushar/Maven-Automation-Demo_Opencart

API Test (Postman):

Did API Testing on almashossain.com my own created site for API testing. API details are available on the website.

Project Link: https://github.com/almastushar/Postman-API-Collection-Test-almashossain_com

Academic Project:

Title: Stock Prediction of Bangladesh Share Market

Description: We developed a system which is based on Data Mining. It could forecast future price of a stock. We used Markov Chain Model to predict the price. We did all calculation in PHP.

Project Details: <https://sites.google.com/view/stock-prediction/home>

Academic Information:

Degree	Subject/Group	University/School/College	Year	CGPA/GPA (4/5)	Board
B.Sc.	Computer Science and Engineering	Daffodil International University	2019	3.79	
H.S.C.	Science	Adamjee Cantonment College	2013	5.00	Dhaka
S.S.C.	Science	Adamjee Cantonment Public School	2011	5.00	Dhaka
